

The world's greatest band still to be discovered, Moving Matter electrifies audiences with high energy improvisational rock. Melted faces at Wakarusa iFestival, earning such praise as "grossest band I've heard in years!" They've dazzled thousands at CampBisco opening the portal to several ears of the name, Moving Matter. Their latest double-disc release under Cromwell Records, "Live at Grego's" is being played on radio stations all over college campuses and even called "brilliant" by the Austin Student. Continually progressing and playing further and further across America, the fab 4 from Austin is just beginning their presence in the music scene...
